# JUST BO A

## A Force in Country Music.

Imagine a soul born in the heart of Birmingham, Alabama, a city with a rich history and musical culture. Lori Rayne, a daughter of this culturally diverse town, has created a music style that transcends convention. Her melodies, which blend the essence of 90's hip hop, blues, and country, reflect the varied influences that have shaped her path. Lori Rayne's soulful voice and heartfelt lyrics create a unique sound that captivates the listener.

Music has always been a passion for Lori Rayne, but she didn't take it to the world stage until 2017 through the internet. In July 2018, she released her much-anticipated first single, "Radiostation (The Beach Song)," which paid homage to her beloved country music and the inspiration behind it. Her second single, "Beaches in California," a collaboration with hip-hop artist Asherr Cole, earned its spot on Spotify's "New Music Nashville."

Lori Rayne's most recent contributions to the world are her debut EP, "1926," a tribute to her grandfather and roots, as well as her newest single "Woo Girls". Now based in Nashville, Tennessee, she continues to leave an indelible mark on the music scene with each note and lyric.
